Subject: RE: Pls RW: WA hydro pre-draft permit and fact sheet

I may need more time to review them but it will depend on whether I can get the Sandpoint response brief finalized and ready for review by tomorrow morning. If I can get that done, I'll turn to the WA hydro permit.

Subject: Pls RW: WA hydro pre-draft permit and fact sheet

Hi Susan and Courtney,

Here is a [link](#) to the second pre-draft permit and fact sheet for the Washington hydro permits at the Sharepoint site. I've scheduled a meeting for Tuesday afternoon. Please let me know if you need more time for review. I'd like to go out for the request for public certification by the end of this week or by the beginning of next week for the Lower Columbia and Snake Rivers.

Main areas for review include:

- Pollutants of concern/reasonable potential
- Use of EALs section
- 316(b) section (Sean Ramach from HQ is also reviewing this section.)

Thanks!

Jenny Wu
